DETAILED ACTION

Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - Claims 1-16, drawn to method of reducing semiconductor defects using acetylenic diol surfactants, classified in class 438, subclass 677.
 - II. Claims 17-30, drawn to process solution containing acetylenic diol surfactants, classified in class 510, subclass 175.
 - III. Claims 31-44, drawn to method for reducing pattern collapse using acetylenic diols or quaternary ammonium surfactants, classified in class 438, subclass 677.
 - IV. Claims 45-48, drawn to method of preparing a process solution for the treatment of semiconductors containing acetylenic diols or quaternary ammonium surfactants, classified in class 438, subclass 677.
 - V. Claims 49-58, drawn to a process rinsing solution for reducing pattern collapse using quaternary ammonium surfactants or acetylenic diols, classified in class 510, subclass 175.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions (I, III, IV) and (II, V) are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be practiced with a

علم

materially different product such as water alone. Alternatively, the applicant's composition can be used for uses beyond semiconductor cleaning such as glass cleaning.

- 3. Inventions I, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions the applicant's method of group I requires specific surfactants whereas groups III and IV allow for a variety of surfactants including the commonly used quaternary ammonium compounds.
- 4. Inventions II and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions Similarly group II requires specific surfactants whereas group V allows for more common surfactants such as the quaternary ammonium compounds.
- 5. The applicant's groups I, III, and IV are very specifically directed to the acetylenic diol surfactants. Groups II and V are directed to thousands of possible surfactants including the very common quaternary ammonium compounds so commonly used to clean semiconductors. It is unclear to the examiner how this very broad class of surfactants is in anyway related to the very specific claims directed to the acetylenic diols.

Conclusion

Application/Control Number: 10/616,662

Art Unit: 1751

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gregory E. Webb whose telephone number is 571-272-1325.

The examiner can normally be reached on 9:00-17:30 (m-f).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta can be reached on 571-272-1316. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
